

## **Notes from August 6, 2025 RTCC Meeting**

Attendees: Lee Barger, Mary Harlan, Sam Gaurino, Erin Fisher, Carlton Henry, Ann Findley, Dawn Dexter, Andy Cotton, Jonathan Flint, Chris Southwick, Hope Hunt, Mandi DiCamillo, Carly Rietmann, Lizzie Williams, Jason White, Dave Snyder, Jon Stavney, Catherine Kristoff, Angie Hainer, Erin Kelican, Alicia Gresley, Erwin Germain, Hanna Auruza, Aaron Hull.

-Dana shared that matching letters for the 5310 grant went out to 8 partners (3 new) at the beginning of June. The ask is a \$37,000 increase from last year's ask (\$67,000 total for 2025) in an effort to have RTCC money to put towards projects. A 20% match is required for the 5310 grant.

-Download the [Two Rivers Connect app](#) if you live in the RFV or CRV to win prizes for taking alternative modes of transportation in August.

-Lee Barger, Erwin Germain, and folks from Two Rivers Connect will meet to discuss how to collaborate and not duplicate services.

-Dana and Erwin are looking for RTCC partners that want to bring TreadShare's carpooling app to other areas of NWCCOG (Eagle, Summit, Grant, Routt, Moffat, Jackson). Snowmass Village in Pitkin County is the newest TreadShare partner. NWCCOG will assist with a TDM grant through CDOT (\$50K) to bring regional carpooling to our area.

-Anne Findley with Summit Stage is working on a CTE/SB230 funding application for a commuter bus from Silverthorne to Kremmling. They are also in the beginning stages of forming an RTA for Summit County and that hopefully will include Alma, Fairplay, Leadville, and Kremmling. A ballot initiative is slated for November 2026.

-Carlton Henry with the Town of Basalt shared about their successful public/private partnership for funding the Basalt Connect with Valley View Hospital.

-Jonathan Flint with Steamboat Springs Transit gave an update on their RTA process. They will go on the November 2025 ballot for voters to form an RTA (no funding attached), with an additional ballot initiative to follow with funding attached in the future. They have seed funding from the ski resort. The communities included in the RTA will be Steamboat Springs, Craig, Hayden, Oak Creek, Yampa, and Routt County.

# Regional Transportation Coordinating Council

## Ride Glenwood On-Demand Transit Pilot Project

Lee Barger, Transportation Engineer  
August 6, 2025

# Ride Glenwood On-Demand

# Program Stats

- Fleet – Ford Transit Vans (3) and Toyota Sienna Minivan
- 2 Wheelchair Accessible Vehicles , Bike rack equipped
- 3 vans operating daily

## Ridership

- May – 4,446 passengers  
Average Wait – 11 minutes
- June – 6,518 passengers  
Average Wait – 22 minutes

A flyer for 'RIDE GLENWOOD ON-DEMAND' featuring 'Point-to-Point Rides'. It includes a QR code, app download links for the App Store and Google Play, service hours (Friday: 7am-10pm, Sat-Sun: 9am-10pm), a service area map, and a 'How to Ride' section. A blue van is shown at the bottom. The text 'Ride anywhere within Glenwood city limits for \$1' is circled in red. The flyer is powered by RFTA (Roaring Fork Transportation Authority) and the City of Glenwood Springs, Colorado.

**RIDE GLENWOOD**  
ON-DEMAND

## Point-to-Point Rides

Download on the App Store GET IT ON Google Play

**Service Hours** Friday: 7am-10pm  
Sat-Sun: 9am-10pm

**Service Area** Ride anywhere within Glenwood city limits for \$1

**How to Ride** Request rides on-demand using the Ride Roaring Fork app, or call (970) 404-4007

Powered by **RFTA** ROARING FORK TRANSPORTATION AUTHORITY **CITY OF GLENWOOD SPRINGS COLORADO** **RIDE**

# Program Funding

- First/Last Mile Mobility Grant  
(Thanks, RFTA!)
- Bus Tax Fund
- \$1 Fare

## Approximate Costs

- Monthly Service - \$83,000
- Startup Costs - \$22,500
- Vehicle Wraps - \$24,000

A promotional poster for 'RIDE GLENWOOD ON-DEMAND' (Servicio de Transporte a Pedido). The top half has a purple and red gradient background. It features the title 'Viajes de punto a punto' and the start date 'El servicio comienza el 1 de Mayo'. A QR code is shown for downloading the app from the App Store and Google Play. Below, three blue boxes list service hours, the service area (within Glenwood city limits for \$1.00), and how to request a ride (via the app or by calling 970-404-4007). The bottom section shows a blue van with the 'RIDE GLENWOOD' logo and a smartphone displaying the app's interface. Logos for RFTA, the City of Glenwood Springs, and the RIDE program are at the bottom.

**RIDE GLENWOOD**  
ON-DEMAND [Servicio de Transporte a Pedido]

## Viajes de punto a punto

El servicio comienza el 1 de Mayo

Download on the App Store GET IT ON Google Play

**Horarios de servicio:** Lunes a Viernes.: de 7a.m. a 10p.m.  
Sábado y Domingo.: de 9 a.m. a 10 p.m.

**Área de servicio:** Viaje a cualquier lugar dentro de los límites de la Ciudad de Glenwood por \$1.00

**Cómo viajar:** Solicite viajes a pedido usando la aplicación Ride Roaring Fork o llame al 970-404-4007

4% of all trips had O-D at Amtrak Station

# Moving Forward

## *Pilot Program extends through 2025*

- Evaluate, Assess, Improve
- Roaring Fork communities migrating to common "Ride Roaring Fork" app in the fall of 2025

*Questions/Comments?*

# Battery Electric Bus (BEB) Pilot Project

**The Roaring Fork Transportation Authority (RFTA) is Colorado's second-largest transit agency and the largest rural transit agency in the United States.**

CURRENT  
**RFTA**  
Service Area

# Summary

## Introduction

- RFTA was an early adopter of battery electric bus (BEB) technology in 2019
- As the second largest transit agency in CO, RFTA plays a major role in helping the State meet climate and electrification goals

## Objectives

- Provide an overview of the *RFTA-Aspen Battery Electric Bus (BEB) Pilot Project*
- Highlight RFTA's challenges and opportunities with BEB technology
- Frame how this project aligns with climate action and electrification goals

# EV Path

- 2019: testing New Flyer BEBs and Holy Cross Energy collaboration
- 2020: 8 BEBs enter revenue service
- 2021: ABB fuel asset integration
- 2023: Climate Action Plan (CAP) adoption
- 2024: Zero Emission Fleet Transition Plan (ZEFTP) adoption
- 2025: first on-route charger in CO installed at Rubey Park in Aspen
- 2025: ordered 10 Gillig BEBs, Q1 2026 production/delivery

# ZEFTP Overview

- 116 revenue bus fleet: 55% diesel; 38% compressed natural gas (CNG), 7% battery electric bus (BEB)
- Current 53 non-revenue fleet: gasoline
- Transition to 100% zero emission revenue and support fleets by 2050 using battery electric bus (BEB) and/or hydrogen fuel cell electric bus (HFCEB) technology
- Estimated \$676 million total cost of ownership (2024 \$) ~ 14% higher than base case

# Opportunities

- State and Regional ZE Goals
- Climate Action Plan (CAP) Goals
- Zero Emission Fleet Transition Plan (ZEFTP) Goals
- City of Aspen partnership
- Holy Cross Energy off-peak time-of-use tariff of only 6 cents/kWh
- Customer and driver feedback
- National Joint Procurement

# Challenges

- “Vintage” 2019 NF BEBs
- Warranty replacement lead time
- Whole systems approach
- Safety and maintenance training
- Find new revenue to budget for expensive ZEV transition
- Federal funding headwinds

# BEB Performance

- Drivers like the torque
- Quiet for passengers
- No dangerous diesel exhaust
- Decreased winter battery range
- Winter regenerative braking slippage
- Heavy bus results in premature suspension and tire repair
- Input/Output Controls are expensive
- Off-route for depot charging
- On-route charging taxes batteries

# What's Next

- 1,000,000 BEB miles @ 8'000' elevation
- Electrified *Veloci*RFTA BRT
- By Q1 2029, RFTA should have 28 BEBs (25% of fleet), on the way to 100% zero emission by 2050
- CO goal: 1,000 transit ZEVs by 2030, < 150 in service or on order
- ZEV Safety & Training Program

# RideNoCo: Connecting You & Northern Colorado

## Legend

- County Boundary
- NFRMPO Planning Area

May 2020  
Sources: CDOT, NFRMPO

- Regional transportation & air quality planning agency
- Formed in 1988 and expanded to current boundaries in 2007
- Over 549,000 people
- Covers about 675 sq. mi.
- Parts of 2 counties and 13 communities
- Greeley Urbanized Area (UZA) & Fort Collins Transportation Management Area (TMA)
- VanGo™ Vanpooling
- **Mobility Program – ALL of Weld and Larimer Counties**

# NFRMPO Mobility Program

- **RideNoCo – One-Call/One-Click Center**
  - Information Hub – website & call center
  - *MyWayToGo* – Trip Planning Platform
    - *Schoolpool* Tool
  - Data for Planning Processes
- **Mobility Committees**
  - Joint Northern Colorado Mobility Committee
    - Larimer County Mobility Committee
    - Weld County Mobility Committee
- **Subrecipient Program & Technical Assistance**
  - Connecting partners to State and Federal Funding
  - Coordinating service expansions in areas where gaps have been identified
- **Community Outreach, Education, and Engagement**
- **Planning Efforts**
  - Coordinated Public Transit/Human Services Transportation Plan
    - *Mobility Action Plan (MAP)* to guide implementation of Coordinated Plan
  - Strategize for Multi-Partner Coordination and Transportation Management Organizations services
  - Feedback to other NFRMPO Planning Processes

# RideNoCo Background

# RideNoCo Program

**RideNoCo** embodies the two overarching goals:

1. Improving **individual mobility**, particularly for older adults, individuals with disabilities, individuals with a lower income, and people who do not speak English as a first language.
2. Improving **regional mobility** through enhanced coordination and collaboration among regional public and private transportation providers, especially in rural areas of Larimer & Weld counties.

# RideNoCo Phased Roll Out

## Phase 1

2021

### Website + Call Center

- Introduction of RideNoCo
- Central hub to identify transportation options across the region and beyond

## Phase 2

2022

### Trip Discovery

- Ability to find and plan trips on public transit and human service providers in the region
- Utilizing GTFS-Flex technology

## Phase 3

2024

### Trip Scheduling

- Long-term vision to find, plan, and book a ride in one place across multiple providers
- Laying foundation for coordination as the region grows by adopting Transactional Data Specifications (TDS)

| RTD                                   | SPIN e-scooters/e-bikes                     |
| Rocky Mountain National Park Shuttles |                                             |

\*GTFS-Flex Databases created by Trillium as part of Trip Discovery project

# Phase Three: Project Background

- **The original vision of this phase of the project was for the NFRMPO to purchase, implement, and manage one scheduling software system on behalf of volunteer providers in the region.**
  - Through a Trip Scheduling Steering Committee convened in 2022, staff found that target agencies were happy with what they had in place and wanted to maintain client relationships.
- **The focus shifted to *coordination* rather than *centralization*, utilizing emerging Transactional Data Specification (TDS) technology:**
  - To help agencies share and coordinate trips while allowing agencies to remain in control of scheduling and relationships;
  - For RideNoCo to assist in determining eligibility and to connect riders to providers that could meet their needs.
- **From the Trip Scheduling Steering Committee, three volunteer transportation agencies were selected to "pilot" the TDS technology:**
  - SAINT, RAFT, and 60+ Ride

## Interoperability using Proprietary APIs

## Interoperability using Transactional Data Specifications

## RideNoCo Interoperability Using Transactional Data Specifications (TDS)

- A: RideNoCo
  - RideSheet
- B: North 40 Mountain Alliance\*
  - RideSheet
- C: 60+ Ride
  - RideScheduler
- D: Berthoud RAFT
  - Spedsta
- E: SAINT
  - Spedsta

## Phase Three: RideNoCo Coordination Project part 2

*A series of projects was undertaken as part of Phase Three:*

- Full Path Transit Consulting customized a **RideSheet** as a TDS-compliant CRM for the RideNoCo Call Center.
- Full Path worked alongside two volunteer transportation scheduling platforms, **Spedsta** & **RideScheduler**, to make all platforms TDS-compliant for use by **SAINT, RAFT, and 60+ Ride**
- **Upon pilot launch in July 2024**, RideNoCo can conduct initial intake on behalf of participating volunteer providers and seamlessly share client info with and among providers; volunteer providers can exchange riders and coordinate trips

**SPEDSTA**

- **Efficiencies and Support**

- Viewing the connection with other providers not as an additional burden, but rather as an opportunity to say "yes" more often
- RideNoCo conducting initial intake cuts down on staff time to register new clients, especially for small providers

- **Relationship Building**

- Undertaking a project of this kind both builds upon existing trust and creates stronger bonds of connection between providers and their staff

- **TDS technology allows for less friction:**
  - For some people, finding a transportation provider that serves their needs is exhausting and time-consuming enough, and that is before the individual must go through the process of registering for the service before use
  - By conducting initial intake at the same time as finding a provider, the amount of time between finding and using a service is significantly reduced
- **TDS technology opens new destinations:**
  - Volunteer providers typically follow strict service areas dependent on funding and driver preferences
  - By being able to schedule trips utilizing multiple providers, new geographies are opened for riders, further enhancing the feeling of independence and freedom.

# Scheduling Software Vendors Perspective

- **Adopting TDS opens the door for more coordination**
  - Replicability
    - Vendors can use the APIs developed by this project for other coordination projects
      - Coordination with any provider that uses these scheduling software vendors
- Reputation
  - Willingness to collaborate, coordinate

1. Human Service Transportation Coordination is hard
2. Transactional Data Specifications weren't nearly as developed as initially thought
3. Budget way more than you think
4. Effective technical collaboration, organization, and transparent documentation are essential for enhancing project tracking and ensuring success.
5. Keep the focus on the provider and their clients

- **Northern Colorado:**

- Now that technology and initial business rules are in place, planning can take place to expand the TDS spec to additional private, non-profit, public transit agencies, taxi services, rideshare, and possibly NEMT applications
- Expansion of *MyWayToGo* and *SchoolPool* Platform

- **Front Range:**

- As DRCOG embarks on the next phase of the RideAlliance project, the TDS spec allows for enhanced coordination between both regions
  - Likely will start with a smaller pilot area first, then refine and expand

- **Statewide:**

- TDS spec can one day allow for every agency in Colorado to be connected

- Did you know the average Coloradan spends 1+ year stuck in traffic?
- *MyWayToGo* is a program created initially by DRCOG to help employers and commuters find the right commute options at no cost by:
  - Helping to improve morale by finding better options for getting around the region
  - Taking advantage of sustainable transit subsidies
  - All while helping to reduce traffic congestion and air pollution.
- *MyWayToGo* has been brought up to our region by the NFRMPO, and our version of the program is called *RideNoCo*.
  - The City of Fort Collins has its version of the program called *Shift Your Ride*
  - The GoNoCo34 TMO will support employers and individuals along US 34 for the program.

# MyWayToGo Information

## Step 1

- Enter your start and end locations on *MyWayToGo.org* to find a way out of traffic.
- You'll see a list of transportation options, and you can compare costs and other data to make your choice.

## Step 2

- Now that you've found your way out of traffic, stay out of it by signing up for *MyWayToGo*.

## Step 3

- Now, plan your trips, which can be done once you're signed up.
- It's much easier to plan and track your trips, contact other carpoolers, and even compete in monthly challenges with other commuters through *MyWayToGo*.

# *MyWayToGo* Feature: *SchoolPool* Tool

*SchoolPool* is a free carpooling program that connects families to share rides for their children to and from school and allows for coordinating transportation options like carpooling, walking, biking, or using public transit.

## **Benefits:**

- More time for kids to make friends and help with homework.
- Parents have more time for tasks.
- Strengthens the community.
- A secure system helps families connect.

## **How to Use SchoolPool:**

- Parents sign up on a secure website to connect with nearby families.
- Parents can register using their home intersection instead of their address.
- Information will only be shared with other families in the network (no third parties will ever see it).
- Visible information includes names, home location, and email addresses, and parents can optionally choose to share their child's grade, gender, phone number, and add comments for special requests.
- The service supports regular, part-time, and emergency trips.
- More families joining increases the chance of finding good matches.

- **Mobility Management + Transportation Demand Management (TDM)**
  - RideNoCo is evolving into a regional TDM program focused on helping the entire region meet its transportation needs.
    - Expansion of DRCOG's *My Way to Go* and *Schoolpool* platform into Northern Colorado

- **Expand Adoption of TDS**
  - Expansion of TDS spec to additional agencies, including private, non-profit, and public transit providers both in Northern Colorado and beyond.

- **Identify & Address Regional Transportation Gaps**
  - Building upon the success of Via Mobility's expansion into Weld County to meet other known mobility gaps in communities such as Red Feather Lakes, Windsor/Severance, and rural portions of Larimer and Weld counties.
